

Theory of Constraints Handbook

Edited by James F. Cox III John G. Schleier, Jr.

Section I What Is TOC?

1 Introduction to TOC—My Perspective Eliyahu M. Goldratt . . . 3

Focus	3
Constraints and Non-Constraints	4
Measurements	4
The Goal and The Race	5
Other Environments	5
The Thinking Processes	5
The Market Constraint	6
Capitalize and Sustain	6
Ever Flourishing	7
Strategy and Tactic Trees	8
New Frontiers	8
References	9
About the Author	9

Section II Critical Chain Project Management

2 The Problems with Project Management Ed Walker 13

Introduction	13
Purpose and Organization of the Chapter	13
Traditional Planning and Control Mechanisms in Project Management	14

Gantt Charts	14
PERT/CPM in the Single Project Environment	15
Brief Review of Project Management Literature	16
Origins of PERT and CPM	16
Project Failures	17
Single Project Management Literature	18
Multiple Project Management Literature	19
Development of Guidelines	19
Macro Issues	21
Micro Issues	25
A Brief Overview of Critical Chain Project Management	36
Critical Chain in the Single Project Environment	36
Brief Review of Critical Chain Literature	38
Summary and Conclusions	39
References	41
About the Author	44

3 A Critical Chain Project Management Primer

Charlene Spoede Budd and Janice Cerveny	45
Introduction	45
Why These Widespread Project-Related Problems Persist	45
Task Duration Uncertainty	46
Traditional Survivor Behaviors	47
Key Elements of Critical Chain	48

Issues in Creating a Project Plan	48
Issues in Managing Project Execution	50
Scheduling a Single Project	50
Modifying Task Duration Estimates	50
A Bit of Statistics	52
Critical Chain Scheduling	53
Critical Chain Scheduling—Steps 1 through 4	53
Merging Paths—Step 5	55
Communications—Step 6	56
Three Sources of Critical Chain Project Protection	58
Scheduling Projects in Multi-Project Environments	58
Establishing Project Priorities	59
Selecting a Scheduling Resource and Establishing Scheduling Buffers	59
Project Control: The Power of Buffer Management	62
Tracking Buffer Consumption	62
Knowing When to Act	63
Adjusting Buffers	64
Using Buffer Consumption Information to Continuously Improve	66
Project Budgeting	66
Components of a Project Budget	66
Assigning Total Project Costs to Project Tasks	68
Implementing a New Project Budgeting Process	69
Project Reporting	69

Internal Reporting	69
External Reporting	70
Causing the Change: Behavioral Issues, Management Tactics, and Implementation	71
Managerial Actions to Support Critical Chain Project Management	72
Importance of Trust	73
Implementing a Critical Chain Project Management System	73
Summary	75
References	76
About the Authors	77

4 Getting Durable Results with Critical

Chain—A Field Report Realization Technologies, Inc.	79
Background	79
Purpose and Organization	79
Recap of Critical Chain	81
Rule 1 Pipelining: Limit the Number of Projects in Execution at One Time	82
Rule 2 Buffering: Discard Local Schedules and Measurements, and Use Aggregate Buffers	82
Rule 3 Buffer Management: Use Buffers to Measure Execution, and Drive Execution Priorities and Managerial Interventions	83

Practical Challenges in Implementing Critical Chain	83
Challenge 1: Gaining Managerial Commitment for Implementing the Three Rules	84
Challenge 2: Translating Concepts into Practical Procedures and Instructions	84
Challenge 3: Sustaining the Critical Chain Rules and Results	84
Step-By-Step Process for Implementing Critical Chain	85
Step 1: Achieve Management Buy-In	86
Step 2: Reduce WIP and Implement “Full Kitting”	87
Step 3: Build Buffered Project Plans	88
Step 4: Establish Task Management	90
Step 5: Implement Surrounding Processes	91
Step 6: Identify Opportunities for Continuous Improvement (POOGI)	92
Step 7: (When Applicable) Use Superior Delivery as a Competitive Advantage to Win More Business	93
Lessons Learned	93
Performance Gains Come from Managing Differently, Not Better Planning and Visibility	93
Implement All of the Three Rules	93
Top Managers Must Play an Active Role	94
Actively Manage the Buffers	94
Frequently Asked Questions	95

Can Critical Chain be implemented without basic project management in place first?	95
Should a pilot be run before a full rollout of Critical Chain?	95
What about cultural and behavioral changes?	96
What is the role of software in Critical Chain?	96
Is a Project Management Office (PMO) needed with Critical Chain?	96
How is non-project work handled with Critical Chain?	96
Should the scope of a Critical Chain implementation include vendors and subcontractors?	97
How does Critical Chain improve quality?	97
Critical Chain seems to be all about timelines; what about controlling costs?	97
Do we need project-level budgets in multi-project operations?	98
Does Critical Chain work with Earned Value Reporting?	98
How does Critical Chain work with Lean?	98
What are the likely causes of failure in implementing Critical Chain?	99
Summary	99
References	100
About the Author	100

5 Making Change Stick Rob Newbold	101
Introduction	101
The Uptake Problem	102
No Urgency to Change	103
The Silver Bullet	105
Negative Branches	106
Root Causes	108
The Cycle of Results (CORE)	108
Basic Principles	109
Simple Example: Cleaning the Room	112
Simple Example: TOC Practitioners Group	112
Other Processes	113
Implementation Planning	116
Planning with the Cycle of Results	116
Traps	118
Summary	119

About the Author	121

6 Project Management in a Lean World—Translating Lean

Six Sigma (LSS) into the Project Environment

AGI-Goldratt Institute	123
-------------------------------------	-----

Introduction: It's a Lean World	123
---------------------------------------	-----

What Is the Project Environment's Point of View

to Being Leaned?	124
------------------------	-----

Project Environment System of Systems	125
What Do We Improve?	127
Translating Lean into the Project System of Systems for Improvement	127
Addressing the Disconnects in Lean Techniques for Project Environments	130
The Five Principles of Lean Applied to the Project Environment	131
Specifying Value	131
Identify Steps in the Value Stream	131
Make Value-Creating Steps Flow towards the Customer	131
Let Customers Pull Value from the Next Upstream Activity	132
Pursuing Perfection	136
Leaning Traditional Project Management	139
References	140
About the Author	141

Section III Drum-Buffer-Rope, Buffer Management and Distribution

7 A Review of Literature on Drum-Buffer-Rope, Buffer

Management and Distribution John H. Blackstone Jr.	145
Introduction	145
Literature on Precursors of TOC and DBR	146
Historical Developments Preceding TOC	146

Derivation of DBR Using the Five Focusing Steps	149
Literature on DBR Scheduling	151
Overviews	151
Applying DBR to Different Types of Facilities:	
VATI Analysis	153
Special Cases	159
Free Goods	159
What if the Market Is the Constraint?	159
Re-Entrant Flows	160
Recoverable Manufacturing and Remanufacturing	160
Buffer Management Literature	160
Buffer Sizing	161
Buffer Sizing and Lead Time	162
TOC and Distribution	162
Supply Chain Management	163
Service Environment	163
TOC and Other Modern Philosophies	164
Problems with DBR	164
Floating or Multiple Bottlenecks	165
Summary and Conclusions	165
References	166
About the Author	173

8 DBR, Buffer Management, and VATI Flow

Classification Mokshagundam (Shri) Srikanth	175
Introduction	175
Managing Flow—Planning and DBR	176
The Need for a Focus on Flow	176
Ford and Toyota Production Systems— A New Perspective	178
Production Operations and the Five Focusing Steps of TOC	180
Characteristics of Production Operations	181
Applying the Five Focusing Steps to Production Operations	183
The DBR System	185
The Drum	185
The Buffer	186
The Rope	189
Managing Flow with DBR—An Example	190
Managing Flow—Controlling Execution and Buffer Management	195
The Need for Control and the Need for Corrective Actions	195
Understanding Buffers: The Buffer as the Source of Information for Controlling Execution	196
Buffer Management—The Process	198
Complex Production Environments and a Classification	

Scheme	199
The Fundamental Elements of the Classification	
Scheme	199
V, A, T, and I Flows—Descriptions and Examples	201
V-Plants	201
DBR in V-Plants	203
A-Plants	204
DBR in A-Plants	205
T-Plants	206
DBR in T-Plants	208
I-Plants	208
DBR in I-Plants	209
Summary	209
References	209
About the Author	210

9 From DBR to Simplified-DBR for Make-to-Order

Eli Schragenheim	211
Introduction	211
A Historical Background and Perspective	212
Three Views on Operations Planning and Execution	213
The Five-Focusing Steps (5FS)	213
The Critical Distinction between Planning	
and Execution	214
Concentrating on the Flow	216

Challenging the Traditional DBR Methodology	217
What Should the Strategic Constraint Be?	217
How Is the Planning and Execution Viewpoint Addressing the Issue of Scheduling and Buffering the CCR?	218
How Does Refraining From a Detailed Schedule of the CCR Affect the Execution?	219
What Does the Emphasis on Flow Add to the Challenge to Traditional DBR?	219
Outlining the Direction of the Solution	219
The Main Ingredients of the Solution	220
The Time Buffer	221
Load Control	222
Determining the Safe Dates	224
Capacity Reservation	228
Buffer Management	229
Short-Term Planned Load	231
The Notion of "Slack"	232
Where S-DBR Fits Nicely	232
The Cases Where S-DBR Does Not Fit	234
Implementation Issues and Processes	236
Looking Ahead to MTS	237
Suggested Reading	237

About the Author	238

10 Managing Make-to-Stock and the Concept of

Make-to-Availability Eli Schragenheim	239
Introduction	239
Why Is a Special Methodology for MTS Required?	240
The Current Confusion in Managing Stock	241
The Common Misunderstanding of Forecasts	241
The Current Undesirable Effects in MTS	243
What to Do? The Direction of the Solution	244
The Basic Principle of Flow	244
From MTS to MTA	244
Determining the Appropriate Inventory	245
Buffer Management in MTA	246
Generating Production Orders and the State of Capacity	248
Peak and Off-Peak Behaviors	250
Monitoring the Target Level Size—Dynamic Buffer Management	251
Too Much Green—the Target Is Too High	251
Too Much Red—the Target Is Too Low	251
Discussion: Issues with DBM and By How Much to Increase/Decrease the Targets	252
The Role of Protective Capacity and the Usefulness of Maintaining a Capacity Buffer	253
The Process of Ongoing Improvement (POOGI)	255

Generic Issues in MTA	256
MTA for Components	256
Which Items Fit MTA and Which Fit MTO?	256
Vendor-Managed Inventory (VMI)	258
Mixed (MTA and MTO) Environments	258
Dealing with Seasonality	259
Problematic Environments for MTA	260
MTS That Is Not MTA	261
Implementation Issues	262
Moving from MTS or MTO to MTA	262
Software Considerations	262
References	264
Suggested Reading	264
About the Author	264
11 Supply Chain Management Amir Schragenheim	265
Introduction: The Current Practice of Managing Supply Chains	265
Problems with the Current System	266
The Natural Tendency for Push Behavior	266
Why Is It Impossible to Find a Good Forecasting Model?	266
The TOC Way—The Distribution/Replenishment Solution	269
Aggregate Stock at the Highest Level in the	

Supply Chain:

The Plant/Central Warehouse (PWH/CWH)	270
Determine Stock Buffer Sizes for All Chain Locations Based on Demand, Supply, and Replenishment Lead Time	271
Increase the Frequency of Replenishment	274
Manage the Flow of Inventories Using Buffers and Buffer Penetration	275
Use Dynamic Buffer Management	279
Set Manufacturing Priorities According to Urgency in the PWH Stock Buffers	280
Why Does a Pull Supply Chain Work Better?	281
Some of the Finer Points in Managing the TOC Distribution/ Replenishment Solution	283
Managing Product Portfolios	283
Rules for Setting up Initial Buffer Sizes	286
Managing Seasonality in the TOC Distribution/ Replenishment Model	287
Known Patterns for Sudden Changes in Consumption	287
Two Different Changes	288
Resolving the Forecasting versus DBM Dilemma to Provide Excellent Consumption before, during, and after an SDC	288
Identifying When an SDC Is Meaningful	289

Handling of an SDC	290
Implementing the TOC Distribution/Replenishment Model— How Can Software Help and Is It Really Needed?	292
Testing the Solution on a Smaller Scale	294
Simulation	294
Pilot Project	296
Managing the TOC Buy-in Process	297
Actual Results of the TOC Distribution/Replenishment Solution	299
Summary	299

Section IV Performance Measures

13 Traditional Measures in Finance and Accounting, Problems,

Literature Review, and TOC Measures

Charlene Spode Budd 335

Introduction

 335

Traditional Cost Accounting and Business

Environment

 336

Development of Cost Accounting

 336

Business Environment, First Half of the

20th Century

 337

Business Environment, Second Half of the

20th Century

 337

Accounting's Response to a 20th Century Changing

Environment	338
Direct or Variable Costing Income Statement	338
Activity-Based Cost Accounting	339
Balanced Scorecard	340
Lean Accounting	342
Traditional Budgeting, Capital Budgets, and Control Mechanisms	343
TOC Approach to Planning, Control, and Sensitivity Analysis	346
Planning	346
Throughput Control	349
Sensitivity Analysis	363
Throughput Accounting Approach to Performance Evaluation	364
Possible Explanations for the Lack of TOC Literature in Accounting and Finance	364
Future TOC Accounting/Finance Research Needs	365
Case Studies and Simulations	365
Information and Decision Making	365
Summary and Introduction of Remaining Chapters in This Section	366
Chapter Summary	366
Other Chapters Dealing with Performance Measures	366

About the Authors 401

15 Continuous Improvement and Auditing

Dr. Alan Barnard	403
Introduction	403
The Goal—Achieving Continuous or Ongoing Improvement	403
Purpose and Organization of This Chapter	404
Key Concepts and Definitions	404
A Historical Perspective—Standing on the Shoulders of Giants	405
Why Change?	406
Introduction	406
The Improvement Gap and Challenges	406
The Types of Management Mistakes When under Pressure to Change	408
The Extent and Consequences of the Failure Rate of Change	408
The Vicious Cycle Related to the High Failure Rate of Change	410
Summary of Why Change?	411
What to Change?	412
Introduction	412
Finding the Core Conflicts within Continuous Improvement and Auditing	412
Finding a Simple and Systematic Way to Break Conflicts	414

Identifying Limiting versus Enabling Paradigms in	
Continuous Improvement	415
Summary of What to Change	416
To What to Change?	418
Introduction	418
Criteria to Evaluate a New Solution	418
Direction of Solution to Breaking the Continuous	
Improvement Conflicts	419
Lessons from CI Methods Developed by Ford	
and Ohno and Other Giants	428
Importance (and Risks) of Measurements	
and Incentives	429
Ensuring the New Direction Addresses	
All Major UDEs	431
Potential Negative Branches and How to	
Prevent Them	438
Summary of “What to Change to?”	439
How to Cause the Change?	440
Typical Implementation Obstacles and How to	
Overcome These	440
Using TOC to Focus and Accelerate Lean and	
Six Sigma Initiatives	441
Using TOC’s S&T as a CI and	
Auditing Tool	443
Summary of How to Cause the Change	447

Summary of Continuous Improvement and Auditing the TOC Way	447
References	453
About the Author	454
Appendix A—Continuous Improvement Opportunity Templates	454

16 Holistic TOC Implementation Case Studies

Dr. Alan Barnard and Raimond E. Immelman	455
Introduction	455
Historical Perspective to Holistic TOC Implementations	455
The Goldratt Satellite Program	456
The X-Y Syndrome of Local TOC Implementations	457
The “4 X 4”—First Attempt at a Process to Launch a Holistic TOC Implementation	458
The Viable Vision Initiative	460
Using TOC’s Strategy and Tactic Tree to Guide Holistic Implementations	460
Catering for Differences within the Private and Public Sector	461
Holistic Implementation of TOC in the Public Sector	461
Background	462
Designing the Five-Day TOC Workshop	

and Implementation Process	463
Proposed Changes to the Traditional TOC	
TP Analysis Roadmap	464
Detailed Case Study: Analysis on Solid Waste	
Management in City A	466
Current Status of Pilot Projects	
(by the End of 2009)	478
Future Application of TOC within	
the Public Sector	480
Specific Lessons Learned from All the Public	
Sector Pilots	481
Future Research	483
Holistic TOC Implementation in the Private Sector	483
The Birth of First Solar Inc.	485
Theory of Constraints Contribution to First	
Solar's Success	488
Building the Foundation	488
Unbolting the Existing Systems and Measures	490
Building on Early Success	490
Implementing the Proven TOC Toolset	491
The Role of TOC's "Thinking Processes" at	
First Solar	492
What Has Made TOC Work at First Solar?	492
Recommendations and Summary	493
Recommended Good Practices for Implementing	

TOC Holistically	493
Summary	496
References	497
About the Authors	498

Section V Strategy, Marketing, and Sales

17 Traditional Strategy Models and Theory of Constraints

Marjorie J. Cooper	501
Introduction	501
What Is a Business Strategy?	501
Factors That Comprise Strategy	502
Criteria for a Good Strategy	503
Theories of Business Strategy	503
Ansoff's Matrix of Four Strategies	504
Porter's List	504
The Resource-Based View	505
Learning/Emergent Strategies	506
A Summary of Schools of Strategy	506
Marketing and Strategy	508
What Is Marketing Strategy?	509
Sales and Strategy	510
Challenges for Strategy and Execution	510
Inadequate Planning	510
Inability to Analyze the System	511
No Theory of Implementation	511

Conflicts within the System	512
Conflicting Standards of Performance	513
Dysfunctional Compensation and Reward Policies	513
TOC Contributions	514
Future Research Opportunities	514
References	515
About the Author	518
18 Theory of Constraints Strategy Gerald Kendall	519
Introduction—What Differentiates a TOC Strategy?	519
Chapter Overview	519
Definitions and Foundations of TOC Strategy	520
Three Goals or Necessary Conditions of Any Strategy	520
The Five Focusing Steps	522
Example—The Five Focusing Steps	522
The Role of Throughput Accounting and Other Metrics in Strategy	524
Overview of TOC Strategy Applications in Manufacturing, Projects, and Consumer Goods Distribution/Retail Organizations	525
Introduction to Strategy Applications	525
Generic Content of S&T Structures	525
Manufacturing	529

Projects	531
Distribution/Retail	535
Six Ways That the Holistic Distribution System Increases Throughput	540
Four Generic Prerequisites/“Injections” for a Lasting Competitive Edge	541
INJ. 1: Increase Customer Perception of Value that Competitors Have Difficulty Copying	542
INJ. 2: Implement Practical Segmentation	542
INJ. 3: Identify and Build the Decisive Competitive Edge Factor	543
INJ. 4: Strategic Segmentation	543
Desirable Effects of a Good Strategy	544
Two Forms of Strategy and Tactics—TP and S&T Trees	545
Integrating Other Methodologies Such as Lean and Six Sigma	546
Dealing with Human Behavior in a Strategy	547
Summary	548
References	548
About the Author	549
19 Strategy H. William Dettmer	551
The Popular Conception of Strategy	551
The System Concept	552

A Vertical Hierarchy	552
A Common Denominator	554
A Whole-System View	554
The OODA Loop	554
Strategy as a Journey	555
Orientation and Observation	556
Decision and Action	557
“Pro-Acting” Rather than Reacting	557
Fast OODA Loop Cycles	558
Summarizing Boyd	558
The Logical Thinking Process	559
The Intermediate Objectives Map	560
Constraint Management Model: A Synthesis of TOC and the OODA Loop	563
The Role of the LTP in the CMM	566

20 The Layers of Resistance—The Buy-In Process

According to TOC Efrat Goldratt-Ashlag	571
Introduction	571
The Layers of Resistance to Change	572
Disagreement on the Problem	574

Layer 0. There is no problem	574
Layer 1. Disagreeing on the problem	576
Layer 2. The problem is out of my control	577
Disagreement on the Solution	578
Layer 3. Disagreeing on the direction for the solution	578
Layer 4. Disagreeing on the details of the solution	579
Layer 5. “Yes, but...” The solution has negative ramifications	580
Disagreement on the Implementation	581
Layer 6: Yes, but... we can’t implement the solution	581
Layer 7: Disagreement on the details of the implementation	581
Layer 8: You know the solution holds risk	582
Layer 9: “I don’t think so”—Social and psychological barriers	582
Sense of Ownership: The Key to True Buy-In	583
Bottom Line	584

Section VI Thinking Processes

23 The TOC Thinking Processes

Victoria J. Mabin and John Davies	631
Introduction	631
Preface to Chapter	631
Purpose of the Chapter	632
Outline of Chapter	632
The Nature, Development, and Use of the TOC TP	632

Overview of TP and Their History and Development	633
The TP Tools	634
The TOC TP Literature	636
The Nature of Other Approaches to Problem-Solving and Decision Making	641
The Relationship of Problem-Solving Methods to Problem-Solving Activity	641
Unstructured Approaches—Management on the Hoof	641
Formal or Structured Approaches	643
Lessons for TOC from the Literature	650
Issues Emerging from the TOC Literature	650
The Nature of the TOC Literature Vis-à-Vis Other Literatures	650
Suggested Topics for a Self-Audit of TOC	651
The Nature and Use of the TOC Thinking Processes Revisited	653
Understanding the Relationship of the TOC TP to Problem-Solving Activity	653
The Philosophical Basis of the TOC TP	655
Summary Insights from Classificatory Mapping of the TOC TP	658
Summary	660
What Has Been Covered in This Chapter	660

Findings and Recommendations	660
